DIDEROT

Modular wall-mounted bookcase, available in two different heights. Each module can be selected in two depths (30 and 45 cm). The bookcase is composed of several elements that recall the cubist aesthetic, and offers great functionality to host books of any size. Diderot can be freely composed to create the most suitable bookcase for any room. The wooden structures with shelves have the same thickness and are slightly raised from the ground by wooden recessed bases. MADE IN ITALY.
