

JAIME

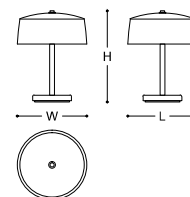

The shade of Jaime is made completely by hand, following the ancient techniques of Murano glassmaking. The glass shade is produced by a traditional process in the furnace, where a series of coloured glass rods are fused on a mass that is superimposed on an internal layer of white opal glass in order to create a series of veins similar to those of marble. The lamp is illuminated by LED of 3000° k. A 'touch' switch with engraved GA logo is located on the base: pulsing it fast the light goes on and off, and with a prolonged pressure the intensity of the light can be adjusted. MADE IN ITALY.
